Reasons for Allowance

Claims 1 and 2 are allowed for the reason the prior art does not teach or suggest in claimed combination, "... detection step of detecting an output value of an electric signal output from each of the pixels a predetermined number of times for each pixel in a state that light incident on the image pick-up system is shut off... an average value calculation step of dividing the sum total of the output values added up at the output value adding -up step by the number of times the output value has been detected at the detection step to calculate an average value of the output values for each pixel."

Claims 3-5 are allowed for the reason the prior art does not teach or suggest in claimed combination, "... a detector for detecting an output value of the electric signal output from the image pick-up system a predetermined number of times in a state that the light source is shut off... an average value difference calculator for finding an average value of the output values detected by the detector for each pixel and calculating a difference between the average value for each pixel and a previously setup value as an average value difference..."
